CAREER OJECTIVE

Disciplined and highly motivated junior full stack web developer. During my course in web development I have gained valuable tech skills and honed my communication skills through efficient teamwork in practical projects. In my previous experience I was able to develop a client-centered approach as well as flexibility, stress-resistance and a problem solving mentality. Now, I am seeking a position in a company where I can contribute with my hands-on mentality and ideas and be mentored towards a successful tech career.
